ASTRA
AGENCY

Be in their minds a year before the tender.

THE NEW WEBSITE, LIVE
astra-qualigraf-group.netlify.app

PREPARED FOR STEVEN GARRATT
GROUP CEO, QUALIGRAF
4 NOVEMBER 2026

The life of a decision is the story you already tell in demos. Three ways Astra can help Qualigraf get known, understood and chosen by councils.

01

WEBSITE DESIGN AND CARE

A website that tells the story of a decision

A new, unified Qualigraf website with a page set for each market, so the UK, France, the Netherlands and Canada keep their own detail. Built on Laravel with an editor your team uses without us, and an inbound flow that sends each enquiry to the right country team.

A council sees how Qualigraf works before the demo is booked.

FROM
£750

A starting price. It rises with markets and integrations. Care plan from £350 a month.

02

AI POWERED GO TO MARKET

A quiet workflow that finds councils a year before they buy

It watches public tender and contract notices, lists the councils heading towards a change of supplier, and puts the right story in front of the right person. One relevant message each, checked by you, with a cap on contact so nobody gets chased.

Qualigraf is already known when the requirements get written.

FROM
£650

Set up and first run. UK first, then each market in turn.

03

BRANDING AND STORYTELLING

One group story that holds in four countries

Your own line, local expertise and global innovation, turned into a story, key messages and a look that three audiences recognise as one company. A workshop with Luna and your country managers, then the group story and key messages written down, with a version for each market.

Every country tells the same story in its own voice.

FROM
€500

Brand and story workshop. A refreshed identity can follow.

HOW WE'D START

Now
A 20 minute call to choose a starting point.

Within 24 hours
A one page proposal, one recommendation, a fixed price.

Spring 2027
The UK pages first, then more markets as budget opens.

You'd work with Raka, who led global go to market at Betty Blocks, a Dutch software company selling abroad, and Luna on brand, with one Dutch point of contact and scope and price fixed before we start.

Shall we find twenty minutes next week to choose where to start?

astraagency.nl

Starting prices, excluding VAT, confirmed in your proposal.

Selected work delivered with our development partner Amwisesa. Unilever 1001 Ramadhan Inspiration, 48 brands. GPay app. MWX AI Market.
